Annual Soil Conservation District Report Issue

THE PATTERN OF CONSERVATION on the land makes a striking picture While contour strips are probably the best known of all conservation practices, they are only one of the tools used by conservationists in an effort to get every acre to produce at its maximum potential.

Soil Conservation District Reports Complete Program

The Lancaster County Soil Conservation District carried on the following activities during 1963

1 The Outstanding Conservation Farmer was Harry Troop Quarryville R3

2 A total of 235 attended the Annual Meeting at Hostetter's in Mt Joy

3 During May Soil Stewardship was observed Seven papers carried Stewardship articles, and several rural Churches used Soil Stewardship materials

4 Rev Grosz of Brunnerville helped with a television program on Soil Stewardship

5 A tour of county farms was held for the County Commissioners

6 Director Chairman Amos H Funk is serving as President of the State Association.

7. The fourth annual Plowing Contest and Field Day were on the Roy Garber farm. There were 8 contestants, and approximately 175 people attended Richard Groff, Lititz RD3, was the winner of the county contest and gained possession of the Plowman trophy for 1963

8 Richard Groff was sponsored by the District in the State Plowing Contest

9 The District sponsored a meeting with the Township Supervisors and the Planning Commission

10 The District helped start a 4-H Conservation Club through Associate Directors

11 Three Watershed meetings were at Blue Ball, Brickerville and Churchtown Area.

12 A district representative attended meetings of the Lancaster Co Agriculture Council

13 The District continued to help sponsor the Silt Sampling Station on the Conestoga Creek

14 The District Cooperating Agencies helped put on six Conservation television programs

15 Use of the film "Beyond Tomorrow", purchased by the Districts last year, is being

(Continued on Page 6)

No Sugar Beet Quotas For State Until 1967

A United States Department of Agriculture official told Pennsylvania potato growers Thursday, it may be 1967 before the Keystone state could get a sugar beet quota even if Congress passes new sugar legislation.

Speaking at the closing session of the state potato growers institute in Altoona, Vernon L Bushman said the present sugar act was written in 1948 and amended in 1962 as a result of the late President Kennedy's embargo on Cuban commodities The act ends in 1966

Under the amendment to provide for domestic growth and expansion of the beet sugar industry, Bushman said, Secretary of Agriculture Orville L. Freeman must reserve each year from the national sugar beet requirements enough acreage to yield 65,000 short tons of sugar.

While the act permits the accumulation of the reserve through 1965, it limits the carryover into 1966 to 35,000 tons

"This limits the amount of sugar available for allocation in 1966 to 100,000 tons," he said, "which is enough for two factories"

Bushman said the agriculture department already has

Breeding Co-ops Approve Merger

Members of the Southeastern and Western Pennsylvania Artificial Breeding Cooperatives have voted overwhelming approval of a resolution to merge organizations and form Atlantic Breeders Cooperative

The vote came at a series of 36 annual District Meetings held during February throughout the service areas of both Cooperatives The overall approval was 85 per cent

The resolution called for support of earlier action by the respective Boards of Directors to consolidate the assets and membership and charter Atlantic Breeders Cooperative to begin operations on July 1, 1964. Special executive committees from both Boards have worked on the plan for several months Membership endorsement now enables them to complete negotiations and combine studs.

4-H Leaders Reelect Officers

The Lancaster County 4-H Leaders council executive board re-elected the full slate of officers Thursday night at the home of Victor Plastow.

Mrs. Jean Thomas, Manheim, was returned as president; Mrs. Harold Fry is vice president, and Wilbur Houser is secretary-treasurer

The board went on record as opposing the present system of choosing club leaders Members felt that election of leaders by club members sometimes resulted in a popularity contest and not necessarily choice of qualified leaders Action was taken to recommend acceptance of any leader who volunteers and is approved by the extension service.

The board set Saturday, September 19, as the date of the annual chicken barbecue which will be held in the Lampeter Community building.

Planners Aid Conservation

A County-wide Water Resources Study has been recommended by the Lancaster County Planning Commission, and a consulting firm has been selected to undertake the first 5 months phase Although $10,000 was allocated in the previous budget, timing of the contract payments necessitates its consideration in the 1964 budget Among other things the study will analyze existing resources, and make recommendations for supplying the future needs of the County Both surface and sub-surface sources will be examined

The Lancaster County Land Subdivision Regulations, which are under the jurisdiction of the Planning Commission have

Co. Dairy Day Is Next Week

New practices in dairy farm management will be the item of interest at the annual Lancaster County Dairy Day next Tuesday

The meeting in the Guernsey Sales Pavilion, Lincoln Highway east of Lancaster, sponsored by the county extension service, is set to get underway at 9 30 a m with Jason Weaver, Quarryville R2, as master of ceremonies

Penn State University Farm Management specialist will discuss "Good Dairy Farm Management - The Key to Success". Good water supply and sewage disposal will be discussed by Joseph McCurdy, extension agriculture engineer.

Milk sales promotion programs will be outlined by Robert McKinley, president of the Dairy Council, and Frank Bushek, manager of the Atlantic Dairy Association

Dr William Pierce, Penn State Agriculture Economics extension specialist will answer the question, "What's the Milk Marketing Outlook for 1964?"

"What's New in the Line of Insecticides and Pesticides for Dairymen?" will be answered by John O Pepper extension entomologist

Dr Samuel Guss extension veterinary specialist from Penn State will wind up the speaking program with ideas on how to prevent and care for some of the major diseases in dairy cattle

The program will conclude with a question and answer period.

SCS Reports Year's Activity

The Lancaster County Soil Conservation Work Unit of the U.S D A Soil Conservation Service completed the following work during 1963.

District Cooperators — 52 — 7377 acres
Cooperators cancelled — 46 — 3519 acres
Land owners assisted — 507.
Services provided — 1637.
Landowners applying one or more practices — 352
Basic plans prepared — 85 — 6363 acres
Basic plans cancelled — 13 — 1215 acres
Basic plans revised — 1 — 2000 acres
Advisory services — 82

(Continued on Page 6)

FIVE-DAY WEATHER FORECAST

Temperatures are expected to average three to nine degrees above the normal range of 47 in the afternoon to 28 at night. The temperatures through the period will be mild but slightly cooler Saturday night and again Tuesday night. Precipitation may total .1 to .5 inch with a chance of a few sprinkles Saturday and more general rain Sunday night or Monday.

Weekly Broiler Report

Placements of 910,000 chicks for commercial broiler production in the State during the week ending February 29 were up 16 percent from the previous week and 39 percent above a year earlier, according to the Pennsylvania Crop Reporting Service.

However, the 10-week total placements were 2 percent below a year ago. Eggs set during the week were 1 percent less than a week earlier and 11 percent under a year ago. The 3-week total settings were 3 percent below a year ago.

In shipments of broiler-type chicks for the past 10 weeks totaling 382,000 were 2 percent below a year ago. Outshipments of 1,758,000 for the 10-week period were down 4 percent.

Broiler chicks placed in the 22 major producing States were up 3 percent from a week earlier and 11 percent above a year ago. The 10-week total was 5 percent above a year earlier Eggs set during the week were up 1 percent from the previous week.

EASTERN PA. & N.J.

Offerings of heavy type hens limited but adequate for light to fair demand A few small lots of colored type sold for 12-12½¢. Colored type hens offering limited for a fair demand with processing supplies supplemented from outside the area. Light type hens offerings barely adequate for a fair demand. Prices paid @farms for heavy type hens 17-18¢. Light type hens 7-9¢ mostly 8-8½¢.

The 141 calves met a steady market at the March 2 sale Choice and prime vealers brought 36-40 50, good and low choice 34-36, standard 30-34, and cull and common 18-25.

Eastern States Buys Egg Co-op

WEST SPRINGFIELD, MASS., March 2 — Bucks County Producers Cooperative Association, Doylestown, Pa., has been acquired by Eastern States Farmers' Exchange, W. D. Milsop, Eastern States general manager, announced today. It will be operated by Eastern States as one of the cooperative's egg marketing branches, bringing the number of such branches to seven Five are located in New England, one in Butler, Pa The new acquisition will be known as the Bucks County Branch

Members of Bucks County Producers approved the merger with Eastern States on February 11, and the final merger agreement papers were signed today in Doylestown by representatives of both cooperatives Ownership of Bucks County Producers was transferred to Eastern States on the same terms under which the large northeastern cooperative acquired the other egg cooperatives some five years ago Eastern States will pay each member of Bucks County Producers for his share of the equity in the association within the next five years, Milsop disclosed.

National FFA Week is scheduled in February to honor George Washington who was an outstanding farmer as well as a great leader.

● Delmarva

Prices Jump; Demand Soars

Live broiler prices advanced sharply in Delmarva during the 24 hour period ending 10.30 Friday morning with a good demand for heavy auction offerings

Prices on the high side of the 1 1 2 to 1 6 2 range at farms were mostly for extended pick up dates Reported purchases during the period were 1,383, 800 head including 675,100 head offered and sold at Thursday's auction at the Eastern Shore Poultry Growers Exchange, Selbyville, Del.

Ready to cook movement was very heavy as most plants were operating at capacity and several retail features were planned for next week. Estiplanned for next week. Estimated slaughter by Eastern Shore processors for the week end was 942,00 head compared to the 770,000 head last week end.

The Delmarva broiler-feed ratio for the week ending Feb 28 was steady with the previous week at 2 9 Broilers during the week averaged 14 75 and mash cost the grower $100 57 The ratio for the comparable week a year ago was 3 4 when broilers averaged 16. 83 and mash cost $99 00

From Where We Stand . . .

Why Worry About Conservation?

Why worry about conserving the soil? We'll soon all be eating synthetic food anyhow

This idea seems to be in the thoughts of many people, but there are three major flaws in this philosophy

First, while there are already a few synthetic food items on the grocery shelves, they are not yet perfected, are high in price, and are a long, long way from becoming widespread in their use It will be many years before synthetic foods are commonplace

Secondly, of the synthetic foods available, nearly all are made from other agricultural products While synthetic beef may not be manufactured by animals eating grass and grain, the soil must produce the soybeans or other crops which form the raw material for the artificial food products

We will have to depend on soil for many years yet to produce the food for an ever growing population

But if tomorrow, by some miracle, we would no longer need agriculture to produce food, there would still be a good reason to conserve the soil

While the earth's surface is about three quarters covered with water, most of it is not fit for consumption Man has learned to remove the salt from sea water, and the impurities from sewage, but the processes are still costly and time consuming

We must learn, and very soon, to use properly and wisely the pure water which falls on our land surface We must devise methods to keep contaminants out of streams, wells and reservoirs We must learn to keep the soil on the hillsides instead of letting it run down the rivers to divert channels, kill fish, cause floods, contaminate domestic and industrial water supplies and fill water reservoirs

We all know that man can not live for very long without food, but he can live even a shorter time without water While there is no immediate shortage of water for drinking in this area, we have seen the total supply cut sharply in recent years because of greater demands for many purposes

Food continues to be in more than ample supply in this nation, but water is becoming critically short in some areas

Water can be conserved, and its conservation goes hand-in-hand with the wise use of the soil.

Even if we did not need to conserve the soil for food protection, we believe the protection of our water supply would justify the small expense involved in keeping the soil on the land

At least that's how it looks from where we stand.

★ ★ ★ ★

Synthetic Meats

Have you ever eaten meat that isn't?

But, like the week that was, it is

If it sounds confusing that's because synthetic beef and chicken are on the market now . . made from protein in soybeans And a Philadelphia firm is making synthetic ham loaf and experimenting with meatless hot dogs

In addition to the meatless meats, the soybean protein products have been used to make foods that resemble potato chips, dried fruits, nut kernels and some fruits and vegetables

Much of the work has been done by a mid-Western grain company that isolated the proteins in soybeans and processed it into fine filaments. These filaments are used to duplicate the fibrous muscle structure of many foods. At the present time, the retail price for synthetic meat products ranges from $1 00 to $1 30 a pound.

Julius F Bauermann, extension food technologist at The Pennsylvania State University, points out that these products will be useful in special medical diets, or will appeal to people whose religious beliefs affect eating habits

Development of these edible protein foods will have particular significance for world areas where population increases are outstripping the food supply, Bauermann said In Pennsylvania, agricultural leaders are interested in whether these foods may replace present animal protein foods and, if so, to what extent Time will tell.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Steps to Faith

Lesson for March 8, 1964

Background Scripture: John 9:1-41.
Devotional Reading: I John 1:5 to 2:6.

NOBODY KNOWS how many miracles Jesus performed during the few years between His baptism and His crucifixion. The writer of the Fourth Gospel says that the world could not contain the books that would have to be written if anyone tried to write up all that Jesus did. John himself makes no effort to tell the whole story. The first three Gospels tell of many miracles; but the Fourth Gospel tells of only seven or eight. John's way of telling the stories is different, also. The first three Gospels just tell what happened and let the reader make his own comments. John makes every miracle a kind of text for a sermon or meditation on the meaning of Jesus, or the meaning of life.

Dr. Foreman

A Man named Jesus

So, we are not going off on the wrong foot, but following the evangelist's example, if we take one of the simpler of these stories and see in it a picture of the way faith grows. In itself the story is indeed simple. The man whom Jesus cured must have been a well-known beggar, for the disciples knew he had been born blind. Jesus made "clay" out of spittle and dust, put it on the man's eyes, told him to go to a certain pool and wash The man washed as directed, and "came seeing." Just like that. The story of the miracle is told. But now begins the part (one of many aspects of this story) that brings us meanings, not simple facts The particular meaning here now for us is the way this man advanced in faith. What did he think of Jesus? is the question. The ex-beggar's first thought about Jesus was just this: "The man called Jesus." Just a man with a name. But the point was: the man called Jesus had cured his blindness. That much the man knew. You may not think this was a very lofty faith, indeed you might argue that it was not faith at all. But it was. He knew Jesus had cured him.

A prophet

A little later, the ex-beggar told the Pharisees (it really was none of their business, they only wanted to "get" Jesus somehow) that in his opinion Jesus was a prophet. This did not mean a soothsayer, a fortune-teller; it meant one who speaks God's truth, a Revealer. A prophet was like a window into the mind of God. Prophets were not supermen, they were quite ordinary men in fact. But they were self-emptying men, they let the Spirit of God have his way with them, they were sensitized to the will of God. Many have come only this far on the way to a full faith. But who shall call them unbelievers? Jesus did not denounce this man for coming short of the belief which the disciples of Jesus had towards him. He did not condemn him at all. So we should be slow about denying the name "Christian" or "believer" to men and women of our own time who think of Jesus simply as a teacher, first among teachers or even as one of many teachers. The Lord took this man where he was and helped him to a still higher faith.

The one Lord

Jesus asked the man, finally, if he believed in the "Son of Man." You and I might not understand that question, but this man did. "Son of Man" was one of the common expressions meaning "Messiah" or "Christ," both of which words were never in the plural. There was to be only one Son of Man, in a class alone by himself. This was more than Prophet, for prophets were many. At its height, faith looks at Jesus not as a mere man, not even as one among other revealers of God, not even as the First Saint; but as God's "only begotten Son," God focussed in a single man, the meeting point of the human and the divine. So the man who had been blind, in more ways than one, has his eyes opened at last to what Jesus said he himself was: the Light of the World. And so he did what no man has a right to do to another man: he worshipped Jesus. His heart had found its home at last, in God.

Letters To The Editor

Reader Doubts Need For Farms

Editor Lancaster Farming
Dear Sir

Lately several articles have appeared in various publications including the Lancaster Farming re either the Malthusian Theory of the population explosion or the necessity of birth control and most seem to believe it will be the American farmer who will rise to the occasion and feed the tremendous increase in humanity If I may take the liberty, I should like to voice my own personal "theories" on these matters

First, I have no doubt Mr. Malthus believed unequivocally in what he theorized and if the world's population had exploded during his lifetime, his predictions may have come true Fortunately, for us, in 1798 he could not foresee nor be aware of the unbelievable technological advances soon to take place Of course, certain factors such as medical knowledge have given support to his theory but wars and the threat of a nuclear holocaust reflect another side of the problem.

Second being a farmer in mind and spirit and an American I am justly and sincerely proud of agricultural advancements and production The American farmer certainly met the tests of war and peace which were placed before him — and I'm certain can continue to meet them but will he have to? This is a question to which I'd like an answer I worried if in decades to come the world (our own country included) will have to rely solely on the farmer for his food For the sake of those of us who wish to preserve the institution of farming I hope I get jumped on for my observations and current beliefs I hope reliable sources can disprove my contention that the starving world will be eating synthetic meats and vegetables rather than naturally grown foodstuffs, that future generations of Americans may be educated to do the same. Most of us who are used to sinking our teeth into real food are not apt to be easily swayed to an imitation pork chop, steak, or turkey but, perhaps our grand-children may Those synthetic foods are already on the market admittably at a substantial price per pound which may be a deterrent to the general populus until the condition is corrected

While this matter of synthetic foods may be frightening to an agriculture already in an economic bind, I cannot help but feel this is the right answer to an exploding population in an already undernourished world The other alternatives seem to be nuclear annihilation or compulsory birth control With neither of these can I be in agreement The solution by war is obviously ridiculous, that of birth control is more a matter of personal con-

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Check Growth of Dairy Heifers

When dairy heifers are from 6 months to one year of age, it's a good practice to measure them and tape them to determine if they are developing fast enough for their age If for some reason they are undersize, then it will still be time to do something about it before they reach breeding age (15 to 18 months) Standards for heart girth measurements and weights at certain ages are available with which to compare the heifers of each breed. Large growthy heifers for their age should make more desirable herd replacements.

To Spray For Wild Garlic

Dairymen are urged to make a special effort to eliminate wild garlic from their pasture fields This weed will not support your quality milk efforts and should be controlled During mid to late March there should be some growth of the garlic and a good time to spray the area with 1½ pounds per acre of the ester form of 2,4-D The garlic will be easier to kill down when young and before the clovers get much growth It may take early spring spraying for several years to get control

To Use Caution with Forage Sprays

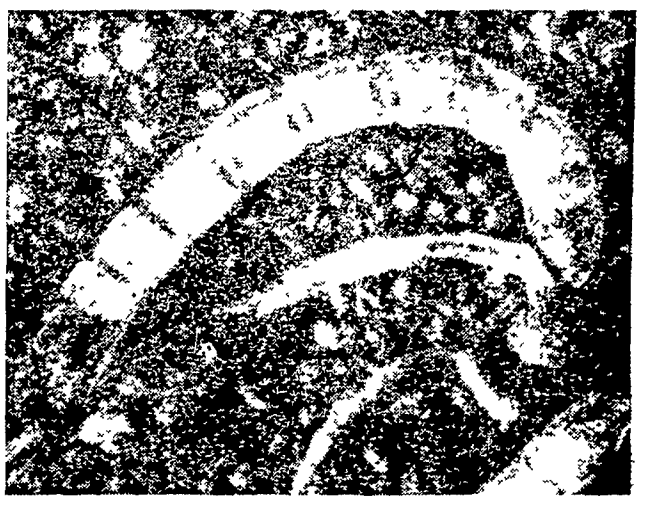
Alfalfa and red clover growers who sprayed their fields last October with either Dieldrin or Heptachlor should not be concerned about any spring spraying for alfalfa weevils or spittlebugs these sprays should give good control However, growers who did not spray last fall may get control this spring by using Guthion at least 21 days before harvest or Malathion at least 7 days prior to harvest Do not use Dieldrin or Heptachlor this spring

To Use Nitrogen on Corn Stalk Ground

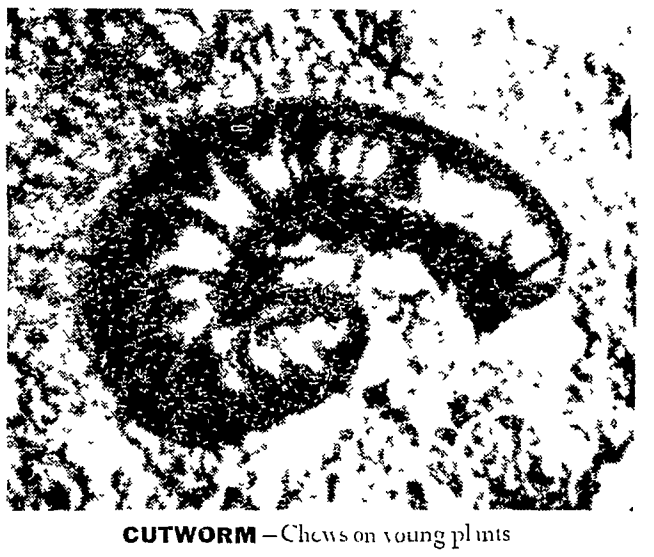
Corn ground that is going back into corn should be treated liberally with nitrogen fertilizer The amount will depend upon organic matter content, use of manure or cover crops, and fertility level; the rotting corn stalks will tie up some nitrogen from the plants. Many fields should get from 100 to 150 pounds of actual nitrogen per acre A complete soil test will furnish the answer Then plow down the fertilizer

THESE PESTS CHEW TOBACCO ...UNDERGROUND:

WHITE GRUB—This insect chews up tender roots as fast as they develop.



WIREWORM—Burrows into stem of tobacco plants.



CUTWORM—Chews on young plants

Read how low-cost aldrin gives long-lasting control of soil insects that destroy seedlings, cut tobacco yields and quality.

A WHOLE army of insects threatens tobacco during the growing season. Wireworms burrow into the stem. Cutworms chew on young plants. White grubs attack the roots.

Aldrin stops all major soil insects attacking tobacco. It controls the insects you see above, plus annual grubs and flea beetle larvae. One aldrin application cleans up wireworms so thoroughly you may not need to treat again for 2 to 3 years. (If you have a cutworm problem the second or third season, apply dieldrin.)

By destroying soil insects *before* they do damage, aldrin allows tobacco plants to develop deep, strong, healthy root systems. Leaves mature faster, develop evenly. Plants are more vigorous and disease-resistant.

RESULT: Aldrin returns its cost many times over in higher tobacco profits.

Aldrin-treated tobacco (*right*) is about 8 feet tall. Untreated tobacco (*left*) is about 5 feet tall.

How to use aldrin

As little as 2 to 3 pounds of aldrin per acre applied as an overall broadcast treatment before planting will give season-long control of all major tobacco pests.

As little as 1 to 4 ounces of aldrin per 50 gallons of water, applied in the setting water during transplanting, will stop root maggots and wireworms—insure a good stand.

Where to get aldrin

Aldrin is available from your local insecticide dealer under various well-known brand names. It comes as liquid, wettable powder, granules, and in fertilizer mixes. Look for the name aldrin on the label or in the ingredient statement.

Shell Chemical Company, Agricultural Chemicals Division, 2299 Vauxhall Road, Union, New Jersey.

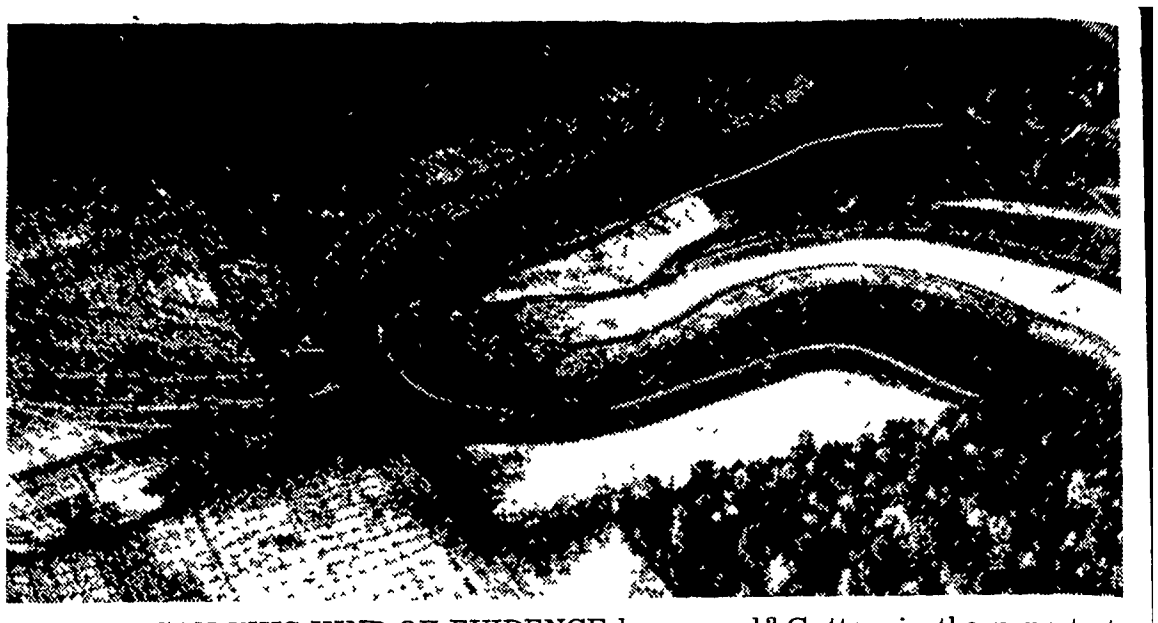
Larry R Corson, Soil Conservationist

Abner S Houseknecht, Conservation Technician

Richard A Shipman, Conservation Aid.



HOW CAN THIS KIND OF EVIDENCE be ignored? Gutters in the unprotected land (upper left) almost disappear on the contour strips. While the large fields do have to give way to strips, many rows become longer and farming on the level saves wear and tear on machinery and men.

WOODLAND BORDERS between fields and woods provides shelter and food for many kinds of wildlife. The Game Commission cooperates with the Soil Conservationists in providing materials for planting and in laying out the plantings.

FARM PONDS like this one near Lititz provide beauty as well as service Fire protection, water supply for livestock and irrigation, are provided by this pond It also provides recreation such as swimming, boating and fishing. The fish commission provides assistance in deciding what fish are best for stocking in particular ponds

A NATURAL DAM in this gutter was formed by the sod Water flowing down the waterway takes soil with it if the soil is not held in place by some kind of cover Grass waterways are one of the major tools of the conservationist.

● Soil Conservation

(Continued from Page 1)

used in school, service clubs etc

16 An Associate Directors meeting was held Farmer Cooperators in the County now total 2,162

17 There were 57 new Cooperators signed during the year with acreage totaling 4-258 acres

18 Held 12 regular monthly meetings Directors attendance was 87 5%.

19 The District in conjunction with Millersville State College constructed a model conservation farm

Forester Makes Annual Report

The year of 1963 was a busy one for the Foresters a year when we needed to protect our woodland more than any other conservation practice The job done by our Forest Fire Wardens in keeping the 13 forest fires in Lancaster County to 281 acres has been remarkable.

(Continued on Page 11)

WATER FLOWS SLOWLY in a tereace which is nearly on the level Slow-moving water has much less soil carrying capacity than rushing water has. Many soil saving practices such as this can be partially financed by the U S. Agricultural Stabilization and Conservation Service. Martin Muth, Work Unit Conservationist inspects the finished job.

Proved on 1963 "Measured Acreages"

When you come down to the final analysis, the BIG profit Factor in raising corn is YIELD. And that's one BIG reason why DeKalb "Yield Breakthru" Corn varieties are making more money for farmers all across the Corn Belt. DeKalb's "Measured Acreage" Program provides an exacting method of measuring the actual "on-the-farm" performance of DeKalb Breakthru Hybrids . . . eliminating practically all chance of error and authenticated by unbiased, capable and reliable witnesses. Yields listed were harvested by normal mechanical means WITHOUT GLEANING. Corn was weighed and tested for moisture, and yields accurately calculated to a per-acre yield of No. 2 corn. What better proof that IT PAYS TO RAISE DEKALB CORN.

Accurate "On-the-Farm" Yield Checks Show DeKalb's Remarkable YIELD POWER

Amos L. Shipman

153.95 Bus. From Lycoming County

DeKalb XL-45 came through with a top-notch yield of 153.95 bushels for Amos L. Shipman, photo at the left, on his "Measured Acreage" in 1963 Mr. Shipman plowed down manure and commercial fertilizer; sprayed for weeds before planting on May 5th, and using 5-10-10 as a starter fertilizer. He will tell you: "DeKalb XL-45 was the best corn I have ever grown. I sure like its short stalk and uniformity. Maturity and yield are tops for my area. I plan to plant a lot more XL-45 in 1964."

. . . and a Fine One from Chester County—145.78 Bus.

A "Measured Acreage" of DeKalb 624 produced 145.78 bushels of Number 2 Corn per acre for Daniel M. Stoltzfus near Parkersburg, Pa. Prior to planting on May 10th, Stoltzfus plowed down manure and 700 lbs., per acre of 15-15-15, and applied a chemical weed killer. Stoltzfus said: "I like DeKalb 624 because it yields and stands."

Columbia County Farmer Makes 135.70 Bushels

"Stalk height, uniformity and maturity were the most outstanding traits I liked in DeKalb XL-45." Those were the words of Frank M Albeck of Millville, Pa., whose DeKalb Breakthru Hybrid produced 135.70 bushels of number 2 corn per acre on a "Measured Acreage" in 1963.

132.65 Bus. Also from Lycoming County

Russell Rosenberg

Russell Rosenberg of Jersey Shore, Pa., photo at the right, had 100 acres in corn last year. A DeKalb Breakthru Hybrid XL-45 planted on a "Measured Acreage", produced 132.65 bu. of No. 2 Corn per acre. Rosenberg plowed down a liberal application of manure and fertilizer and applied a starter fertilizer at planting on May 15th.

Lycoming County Scores Again with 112.74 Bus.

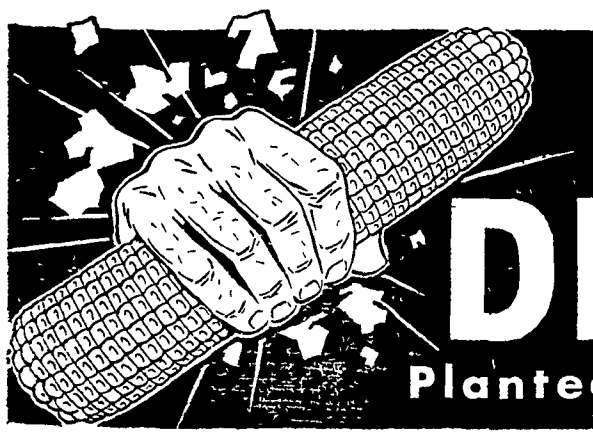
Cyril Johnson harvested 112.74 bushels of Number 2 DeKalb Corn per acre from a "Measured Acreage" on his farm near Montgomery This field had been in corn for 3 years previously. 300 lbs. of 5-15-5 were used at planting.

Here's 110.36 Bushels from Blair County Farmer

Dale M. Furry's "Measured Acreage" of DeKalb XL-45 produced 110 36 bushels of Number 2 corn per acre in spite of below normal rainfall. He plowed down manure and 16-16-16 fertilizer; treated for weeds chemically and planted May 6th for a stand of 20,000 plants per acre.

Clinton County Farmers Make 109.26 Bushels

DeKalb 805 made 109.26 bushels of Number 2 corn per acre on a "Measured Acreage" in 1963 for Percy Laubscher near Lockhaven, Penn. He said: "I planted all DeKalb Single Crosses in 1963. I like the pickability and disease resistance of DeKalb 805. 1963 was the 3rd year I've planted 805."



DEKALB AGRICULTURAL ASSOCIATION, INC., DEKALB, ILLINOIS

Commercial Producers & Distributors of DeKalb Corn, Chix & Sorghum

"DEKALB" is a Registered Brand Name

DEKALB® "Breakthru" Corn

Planted by More Farmers Than Any Other Brand.

Co. ASCS Office Cooperates On Many Approved Practices

A total of 593 farmers were enrolled and completed needed conservation practices under the 1963 Agricultural Conservation Program Practices were completed and cost-share paid as follows

Practice	Farms	Units	Amounts
Liming grassland	429	5159 acres	$36,239 49
Establishing permanent grass cover	187	1822 acres	20,948.11
Improvement of established cover	127	2283 acres	24,460 99
Establishing permanent cover to protect diversions, ditch banks, etc	5	7 5 acres	251 26
Establishing winter cover crops	184	3150 acres	4,603 31
Contour Stripcropping & hedgerow removal	56	2084 acres	8,560 49
Clearing & leveling pastureland	6	47 acres	705 00
Establishing Sod Waterway	6	5085 feet	721 42
Constructing Diversion Terrace	9	7758 feet	885 69
Constructing Open Drainage Systems	2	2250 feet	386 81
Installing Tile Underdrain	11	10,196 feet	1,562 37
Planting of Forest Trees	5	27 acres	454 92
Fencing of trees for protection from livestock	2	130 rods	130 00
		Total —	$99,909 86

In addition to the amount paid farmers for establishment of the practices, $2975 of the 1963 ACP allocation was transferred to Soil Conservation Service for technical services required in establishment of permanent type conservation practices

CONSERVATION RESERVE PROGRAM

There are still 47 farms under Conservation Reserve contract, earning annual payment of $37,699 81 on 1841.0 acres, and one contract was extended for one year under the Land Use Adjustment program earning $305 60 on 26 8 acres.

WOOL INCENTIVE PAYMENTS

The following payments were made in 1963 for wool and unshorn lambs sold during the 1962 marketing year

140 producers received $3,248 98 for shorn wool 57 producers received $626 44 for unshorn lambs.

FEED GRAIN PROGRAM

A total of 311 producers enrolled in the 1963 Feed Grain Program, diverting 3887 5 acres from corn production, 12.0 from grain sorghum and 257 3 from barley for total diversion payments of $168,051 69 Additional price support payments for feed grain grown totalled $25,968 63

WHEAT STABILIZATION PROGRAM

117 producers diverted 660 8 acres from wheat production, receiving $21,967 71 in diversion payments and $1,371 06 as price support payments.

WHEAT ALLOTMENTS & MARKETING QUOTAS

Wheat allotments were established for 5835 farms in 1963. Wheat marketing cards were issued to all eligible producers 6 farmers applied for Feed Wheat exemption.

PRICE SUPPORT PAYMENTS

Wheat — 122 farmers stored 80,776 51 bushel in local warehouses, and received price support of $152,102.76

Four farmers stored 3007 bushel on the farm, and received $6,018 37

LANCASTER COUNTY ASC COMMITTEE

Fred G Seldomridge
Elmer L Huber
John J Herr

"Honoring Rural Opportunities and Responsibilities" is the theme for National Future Farmers of America Week.

Game Protector Lists Activities

The following is an accomplishment report by the Game Commission showing work completed in Lancaster County during the past year.

On the four Farm Game Projects we have a total of 27,275 acres.

Farmers contacted — 498
Conifers distributed — 3200.
Wildlife Borders cut — 2000 lin ft
Refuges Maintained — 20.
Safety Zones established — 291

There are five tracts of State Game Lands in Lancaster County comprising a total of 5402 acres.

Cover Crops seeded on strips — 30 acres.
Strips mowed — 19 acres
Woodland border cut — 3400 lin ft

T. A Reynolds, Supervisor
Southeast Division
Pennsylvania
Game Commission

S C Mace, Land Manager; C J Williams, J. P Eicholtz, W E Woodring, District Game Protectors

Creeks, River Stocked With Trout And Bass

In 1963 the Fish Commission stocked 18 trout streams in Lancaster County with legal size brook, brown and rainbow trout, distributed fingerling trout to Sportsman's clubs for rearing and distribution in the County Susquehanna River was stocked with muskellunge in the vicinity of Columbia and also in the Pequea Creek and Big Conestoga Creek.

The commission cooperated with farm pond owners in regards to algae and weed control and issued permits for chemical treatment of ponds, shocked and seined farm ponds in regards to fish balance.

Channel changes and pollution investigations were made in conjunction with the Health Dept

Robert M Betts, Pa Fish Commission.

● Co. Planners

(Continued from Page 1)

several items included which directly affect Soil and Water Conservation Certain regulations concerning the removal of surface water and sub-surface sewage disposal are designed to prevent erosion and pollution of ground water.

Comprehensive Community Development Plans undertaken by the Planning Commission consider soil and water conservation when recommending areas for future development. It is felt that not only should existing conservation problems be treated, but new ones should be prevented.

The State's PROJECT 70 proposal was actively supported by the Planning Commission through its Park & Open Space Advisory Committee Several sites are presently being considered in the County where these funds might be used The Commission feels that parks and open space areas will promote Soil and Water Conservation as well as creating recreational facilities

C. Bickley Foster, County Planner.

Charles S Conrad, Jr., Chairman, Lancaster County Planning Commission.

● Sugar Beets

(Continued on Page 4)

20 applications for the remaining two 1966 quotas.

"In view of the widespread interest in the reserve acreage program," he said, "it is reasonable to assume that bills will be introduced in the Congress to provide for a comparable program after 1966"

Bushman noted it is possible that action may be taken to continue an acreage reserve program for future years.

Where two areas request quotas and intend to begin processing beets the same year, a selection is made on the basis

(1) Firmness of capital commitment, (2) suitability of the area for growing sugar beets, (3) the proximity of other mills, (4) need for a cash crop or a replacement crop and (5) accessibility to sugar markets

In reviewing these requests, Bushman said, it has been found that firmness of capital commitment has been the most difficult for most localities to meet

● Letters

(Continued from Page 4)

viction.

The farm publications are painting a bright rosy future for the farmer — an image of his goods and services being desperately needed for the survival of the world's populus Unless the inventiveness of man suddenly ceases, I can't "buy" this reasoning. I firmly believe the farmer of the future will have more problems in merchandising than he now faces And, TODAY, not tomorrow is the time to start looking for answers to this dilemma.

Sincerely,
Carol Henkel
Strasburg R1

Transfer Milk Efficiently From Cow to Bulk Cooler

The "Sputnick" MILK-PORTER is the cleanest, most efficient method for transferring milk from cow to bulk cooler.

- Manufactured from heavy gauge stainless steel.
- Lid seals tightly to keep milk germ free.
- Passes through openings 29" and over.
- Moves quiet and easily on rubber-tired, ball bearing wheels.
- Does away with long, expensive pipe lines, milk pumps and releaser.
- Two sizes.
- Low-cost sanitizing.

4-H Beef Club Reorganizes

Eugene Hosler, son of Mr and Mrs Mark Hosler, Manheim R3, was elected president of the Red Rose Baby Beef and Lamb club Wednesday night.

The new president, elected at a meeting in the Brecht Elementary School, Lititz Pike, served the club last year as treasurer He succeeds Mary Jane Herr of Retton.

Other officers elected were Kenneth Weaver, Quarryville R2, vice president, Carol Ann Hess, Strasburg R1 secretary; Nancy Frey, Marietta R1, assistant secretary, Kenneth Hess, Strasburg R1, treasurer, William Houser, Lampeter, and Judy Longenecker, Holtwood R1, song leaders, Jay Bixler, Marietta R1, and Anna Mae Donough, Columbia R1, game leaders, Janet Frey, Marietta R1, and David Heisey, Sheridan R1, news reporters.

Adult club leaders are Jay R Nissley, Manheim R3, J Harold Frey, Marietta R1, Elvin Hess, Jr, Strasburg R1, Melvin Rohrer, Lititz R3, Fred Linton, Quarryville R2, and Mylin R Good, Manheim R1

The club voted to hold meetings on the first Wednesday of each month and to continue dues of $1 00 per year for beef club members and 75c per year for lamb club members.

A TENSE SCENE from the 4-H County Council play, "The Courtship of Eddie's Father", as Elizabeth (Gloria Hershey) falls into the arms of Tom (Donald Trimble) while Eddie (Terry Myer) looks on The play, directed by Robert Schappell, and featuring a cast of 20 4-H members, will be presented March 13 and 14 in the Hempfield High School auditorium at 8 p.m. The play was postponed from February 28 and 29.

Highways Are Protected From Soil Erosion

The Pennsylvania Highways Department accomplished the following in cooperation with the Lancaster County Soil Conservation District during 1963.

Contract Seeding and Mulching

A total of 369,102 square yards (74 acres) of seeding and mulching cut and fill slopes was done by contract along 20 miles of new road construction. The routes involved were L R. 36009, 792, 36008, 344, 36007 and 36053.

Revitalization

The grass on cut and fill slopes as well as on median and interchange islands was revitalized along L R. 36008, 36007, 36011, 36024, 136, and 148. A total of 32 miles of highway were treated Materials used included 5 1/2 tons of 8-16-16 fertilizer, 200 lbs. of grass seed and 50 lbs. of crown vetch seed. The grass and fertilizer was applied in water in one application with the use of a 1000 gallon hydroseeder.

H P. Kauffman, Roadside Engineer, District 8-0

FHA Loans Help Farmers Conserve Soil

Farmers Home Administration lending authorities have been greatly expanded in recent years to help meet a broad range of rural needs. Some of these which aid in Rural Areas Development include: Assistance to low income farmers; building of homes including housing for the elderly; and the development of outdoor recreational facilities for added income and the installation of water systems for farmers as well as rural communities.

Loan programs which were of particular importance in the local area last year including the following:

Operating Loans to both full-time and part-time farmers to improve their incomes, to pay for equipment, feed, seed, livestock, for other farm and home operating needs, and to refinance chattel debts.

Soil and Water Conservation Loans are available for the development and efficient management of farm resources crucial in the success of farmers here in the county and throughout the state Many farm families using Farmers Home Administration services have become District Cooperators and all are urged to adopt soil and water conservation practices in solving farm and financial management problems.

Richard W. Hoover, County Supervisor.

Mechanization Of Harvesting Is Called Gardner's Biggest Need

Mechanized harvesting is probably the greatest challenge to the American vegetable industry, Pennsylvania vegetable growers and canners' fieldmen were advised recently during their annual conference at The Pennsylvania State University.

"We've improved our efficiency in planting, spraying, and packing vegetables, but after 30 years we still harvest tomatoes, cucumbers and many other vegetables by hand," declared John Carew, of the horticulture department at Michigan State University.

Dr. Carew said the science of horticulture "must seek out new ideas for improving efficiency in producing and marketing its products." The horticulture industry must strengthen both the research and extension phases of the state universities, he affirmed.

He urged growers to develop their own ideas and to be aware of other developments. He pointed out that controlled atmosphere storage, dwarf apple trees, and 2,4-D and DDT were not original American ideas. Americans, however, used these to the fullest extent.

The field of horticulture needs skilled executives, he affirmed, to represent horticultural interests in legislature and at international conferences. And he called for more cooperative efforts in developing new marketing procedures and in promoting horticultural products.

Fruit Growers Asked To Return Survey Forms

HARRISBURG — State Agriculture Secretary Leland H. Bull today urged fruit growers to return survey reports promptly to the Pennsylvania Crop Reporting Service

Survey cards were mailed recently to growers asking for information about number and age of trees and grapevines, and about varieties being introduced or discarded The information will be summarized and published in a bulletin that will be available to all fruit and grape growers and allied fruit interests, Secretary Bull said.

"Growers need these facts to meet the impact of changing conditions, market requirements and competition," Secretary Bull explained, "and in orderly planning for the years ahead."

Witmers Win National Award

PETERBOROUGH, N H — Raymond F. and Louise A. Witmer, owners of Penn-Del Farm, Willow Street, Pennsylvania, have been named Gold Star Guernsey Breeders for 1963 by The American Guernsey Cattle Club. This is their second award.

The Witmer's met all of the requirements for this award during the past year Some of these requirements were that all Guernseys over eight months of age owned by the farm were registered, that the herd included at least 10 registered Guernsey cows with production records made official during the year with at least 70% of them home-bred, that the herd was on official AR or HIR-DHIR test with a lactation average over 10,810 pounds milk or 525 pounds fat, 305-2X M E. and that 80% of the cows with official records completed during the year were classified with an average score for the group of 82.5% or better.

The production summary of the Witmer herd showed 32 cows with 32 records averaging 11,817 pounds of milk, 609 pounds of fat, 305-2X M E. and with an average classification for 32 cows of 85.1 percent.

Science In Ag. Open House Set

University Park — Opportunities for men and women with a college education will be stressed in the annual "open house" to be held March 28 by the College of Agriculture and the biological science departments of the College of Science at The Pennsylvania State University.

Underway from 8:00 a m to 4 00 p m , the open house will acquaint young persons and adults with developments in the agricultural and biological sciences, says Glenn O Bressler, general chairman and professor of poultry science

Lecture-demonstrations, Dr Bressler adds, will describe a $90 billion industry employing over 20 million people as production workers, supervisors, managers, fieldmen, salesmen, credit men, newsmen, teachers, laboratory workers, technical workers, technical researchers, economic analysts, and other careers.

Featured in lecture-demonstrations and exhibits will be (1) agricultural business and education, (2) agricultural engineering and physical sciences (3) animal sciences, (4) biological sciences, (5) plant sciences, and (6) counseling for careers.

Last year nearly 3,500 high school students, teachers, and parents attended the open house This year's committee has mailed an invitation and a folder describing the day's events to all high schools in the State — plus leaders in business and industry.

Star Farmer of America is the nation's best known farm boy award. It is a check for $1,000 presented each year by the Future Farmers of America Foundation to the FFA member judged most outstanding in farming and leadership.

Save Baby Pigs

About one-third of all pigs born never reach market, says Les Burdette, extension livestock specialist at The Pennsylvania State University. Cold, drafty, wet farrowing pens cause troubles with baby pigs. The high death rate among baby pigs can often be prevented by good management

THREE-BOTTOM SPINNER PLOW for D-17 Power

Now you can have the performance of an Allis-Chalmers 80-Series plow in a big 3-bottom spinner model designed specifically for the Allis-Chalmers D-17 Tractor. This new, deep-working plow is designed for depths down to 14 inches. It is available with special deep-plowing bottoms. Plow is revolved at the end of a new vane-type hydraulic activator. Plow rotates on bronze *bushings*. Rear gauge wheel automatically positions itself for both right- and left-hand bottoms. Furrow gauge wheels control depth of front bottoms. Plow is available either with SNAP-COUPLER hitch or category two 3-point hitch. Bottoms are protected by shear bolt action or by optional spring-trip beams. A similar 2 bottom spinner model is available for D-15 Tractors.

SNAP COUPLER is an Allis-Chalmers trademark.

Finance for profit. Ask us about Allis-Chalmers time payment plans.

For the Farm Wife and Family

Irish Fare Fittin' For Everybody

SPENCE

By Mrs. Richard C. Spence

Whether you're Irish or not, corned beef simmering gently on the range seems to murmur that the dinner menu will be a hearty one The usual vegetables cooked and served with corned beef are cabbage and boiled potatoes but a delightfully unusual switch is to sweet potatoes and Brussel sprouts

Modern corned beef brisket is easy to buy in family-size drip-free packages ranging in weights from 2½ - 6 pounds There is a choice to be made between regular and garlic and spice cures A personal touch can be added to the regular corned beef by adding a bay leaf and onion slices, or caraway seeds to the cooking water The subtle flavor may be linked to a rich golden raisin sauce by including caraway as one of the ingredients

A good cook who makes the best use of her time often cooks a piece of corned beef brisket large enough to serve for more than one meal And incidently she may shorten the total cooking time considerably by using a pressure saucepan and the directions recommended by the equipment manufacturer

A second meal idea is to cut the cooked corned beef into half inch cubes to be added to a hearty salad combination of cooked sliced beets and potatoes and chipped dill pickle A tasty marinade is made of salad oil, vinegar dry mustard, dill weed, chopped chives, and salt and pepper to pour over the meat and vegetables. The seasonings blend well during chilling. The salad can be served in lettuce or cabbage leaves and garnished with wedges of hard-cooked eggs.

* * *

CORNED BEEF WITH SWEETS AND LITTLE CABBAGES

3 to 4 pounds corned beef with garlic and spice
1 bay leaf
1 small onion, sliced
8 sweet potatoes
2 packages (10 ounces each) frozen Brussels sprouts

Place corned beef in a kettle and cover with water Add bay leaf and onion and cover. Simmer 3 to 3½ hours or until fork-tender Add pared sweet potatoes last 30 minutes of cooking time Add frozen Brussels sprouts the last 15 minutes of cooking time Remove corned beef to platter and arrange vegetables around it

NOTE If corned beef brisket with regular cure is used, add 1 teaspoon mixed whole spices to cooking water.

* * *

CARAWAY CORNED BEEF

3 to 4 pound corned beef brisket
1 bay leaf
1 teaspoon caraway seeds
1 small onion, sliced

Place corned beef in a kettle and cover with water Add spices and onion and cover. Simmer 3 to 3½ hours or until fork-tender. Serve hot with Golden Caraway Sauce

GOLDEN CARAWAY SAUCE

1½ cups apple juice
1 tablespoon cornstarch
2 teaspoons lemon juice
¼ teaspoon grated lemon peel
½ teaspoon caraway seeds
½ cup golden raisins
1 teaspoon brown sugar
⅛ teaspoon salt

Combine apple juice and cornstarch in a saucepan. Add remaining ingredients and cook, stirring constantly until sauce is thick and clear. Serve hot over corned beef.

* * *

CORNED BEEF AND APPLE EN CASSEROLE

8 to 10 slices cooked corned beef
2 teaspoons lemon juice
3 cooking apples, pared and sliced
⅓ cup brown sugar
1½ tablespoons flour
2 onions, peeled and sliced

Add lemon juice to apple slices. Blend brown sugar and flour. Place ingredients in layers in a 1½ quart casserole, beginning with half the apple slices, then half the onion slices, sprinkle with half of the brown sugar mixture, and top with 4 to 5 slices of corned beef. Repeat Cover casserole and bake in a moderate oven (350 degrees) for 40 minutes, or until apple slices are tender.

* * *

Another variety meat that is suitable for any meal is bacon Bacon is good by itself but many other foods are enhanced by its flavor. Salads, soups, sandwiches, maindishes, dips — just about anything you can think of takes to bacon.

BACON-CORN CHOWDER

½ pound sliced bacon, cut into 1 inch pieces
2 small onions, peeled and sliced

Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

THURSTON

Good To Know Anytime

It's a good idea to have a qualified serviceman check your heating equipment at least every year He'll inspect operating parts and controls and make necessary adjustments

Many homemakers like to have their laundry appliances near the kitchen This arrangement allows for dovetailing different household chores.

After you've had an appliance serviced in your home, ask the serviceman for an itemized bill that includes cost of service and parts replaced. Before the serviceman leaves, check the appliance to see that it's operating properly. And it's a good idea to find out if there's a guarantee on the plastics" . . . "Use sparing-service job and the parts. ly" . . "Maybe harmful if

A clothes dryer saves the swallowed." These are typical average homemaker twenty directions you'll find on labels work days of eight hours each of pesticide containers. Such and forty miles of walking in directions are put there for a year. your protection.

Protection With Pesticides Directions on the label tell "Never spray directly on

● For The Farm Wife

(Continued from Page 15)

serve ¼ cup bacon drippings and place in a kettle Saute onion in bacon drippings about 5 minutes Blend in flour and mix to a smooth paste Gradually add the water and stir until smooth Add the potatoes, celery and bay leaves Cover and cook over low heat for about 15 minutes or until potatoes are done Stir occasionally Blend in corn, milk, seasonings and bacon Heat for 15 minutes Serve hot If desired, sprinkle with chopped chives before serving

* * *

Stuffed cabbage leaves are easy to do —

STUFFED CABBAGE LEAVES

12 to 14 large cabbage leaves
2 pounds ground beef
15 Triscuit waters, finely rolled (about 1 cup crumbs)
1 cup chopped onion
½ teaspoon dry mustard
¼ teaspoon pepper
½ teaspoon basil
2 eggs, well beaten
1 teaspoon salt
½ teaspoon garlic salt

Soak cabbage leaves in boiling water for about 2 minutes Drain Combine remaining ingredients and mix well Spoon about 4 tablespoons of mixture into center of each leaf. Fold over envelope style. Secure with toothpicks, if necessary. Place in shallow baking dish Pour sauce over cabbage rolls and bake in moderate oven (325 degrees) 45 minutes Serve from chafing dish Makes 8 servings

SAUCE: Combine 2 8-ounce cans tomato sauce, ½ cup chili sauce and 1 tablespoon horseradish Heat

* * *

GOURMENT BEANS

3 cups cooked green beans, cut in ¾-inch lengths
⅛ teaspoon savory salt
2 tablespoons butter or margarine
1 4-ounce can mushrooms, drained and sliced
1 tablespoon minced onion
1 tablespoon chopped parsley
2 tablespoons blanched slivered almonds
1 teaspoon flour

Cook beans until "tender-crisp" in boiling salted water to which the savory salt has been added Do not overcook Drain Brown mushrooms, onion, parsley and almonds in butter, stirring gently, until they are golden brown. Push ingredients to one side of fry pan and stir the flour into the remaining butter. Mix all ingredients together. Pour over cooked beans and stir until the beans are covered with the sauce Serves 6.

* * *

SPANISH GREEN BEANS

1 tablespoon fat or oil
1 tablespoon chopped onion
¼ cup chopped green pepper
1 cup cooked or canned tomatoes
1½ cups cooked or canned green beans
Salt and pepper
Toasted bread cubes

Heat the fat and brown the onion and green pepper in it. Add tomatoes and cook slowly about 15 minutes. Add beans and season to taste with salt and pepper. Heat thoroughly Turn into serving dish and top with bread cubes 4 servings

* * * *

ORANGE PRUNE WALNUT WHIP

1 envelope unflavored gelatine
⅓ cup sugar
½ cup cold water
1 cup orange juice
3 tablespoons lemon juice
1 cup chopped, cooked prunes
½ cup chopped walnuts
1 cup orange chunks, drained (2 medium oranges)

Mix gelatine, sugar, and water in top of double boiler. Heat over hot water until gelatine and sugar dissolve, stirring constantly. Remove from heat; cool, then stir in orange

and lemon juice Chill until mixture is slightly thicker en egg white Beat with rotary than the consistency of unbeat- or electric beater until light and fluffy and double in volume Fold in chopped prunes, walnuts, and orange chunks Pour into a 1-quart mold, hill until firm Makes 6 servings.

* * *

GLAZED CARROTS

2 tablespoons chopped onion
1 tablespoon chopped parsley
2 tablespoons butter or margarine
8 medium-size carrots, cut in 1-inch pieces
1 can (10½ ounces) condensed consomme
Dash nutmeg

In saucepan, cook onion and parsley in butter about 5 minutes Add carrots, consomme and nutmeg Cover and cook about 15 minutes. Uncover. Cook an additional 15 minutes, or until carrots are tender and sauce is slightly thickened. Makes 4 servings

* * * *

CHEESE-RICE CASSEROLE

½ cup canned mushrooms, stems and pieces
1 tablespoon chopped onion
¼ cup coarsely chopped almonds
1 tablespoon butter or margarine
½ cup uncooked rice
2 tablespoons chopped parsley
½ cup shredded cheese
1½ teaspoons salt
1 teaspoon meat extract
1½ cup hot water and mushroom liquid

Drain mushrooms; save the liquid Lightly brown mushrooms, onion, and almonds in the fat. Add uncooked rice, parsley, and cheese, mix thoroughly Place mixture in a greased casserole Add salt and meat extract to the water and mushroom liquid and pour over the rice mixture Bake at 375 degrees 45 minutes to 1 hour, until rice is done 4 to 6 servings

Care Of Frozen Foods At Home

When you return from shopping, unpack and put frozen foods away first If any packages have softened slightly, place them on the quick chill metal surfact in the ice-cube tray section of your refrigerator or in the freezer Leave space for air to circulate around packages If the ice-cube compartment of the refrigerator is your only storage space, buy only what frozen foods you can use within a day or two.

Put your latest buys in the back, oldest ones out front Although frozen foods are good keepers, make room for new ones . . this gives you the best menu variety

Most frozen-food packages list contents, plus directions for cooking, heating, and serving Some of this information is required by law But most of it the packer has carefully developed to help you enjoy his product

Decorations For Children's Food

Use crisp cereal shapes to decorate and add interest to children's foods Across a shallow dish of applesauce, place a parade of cereal animal shapes Sprinkle star shapes on top of the cream used on chocolate, vanilla, or fruit-flavored puddings Heat doughnut and letter shapes of crisp cereal in a little butter, then let each child sprinkle them on soups creamed vegetables, and creamed meat or poultry on toast Do this just before eating so the cereal doesn't lose its crispness

Why Crops Need Limestone

Two important ingredients needed by crops are calcium and magnesium. Both are regularly lost through the soil by the following ways:

(1) By leaching, which is a slow leaking away, a normal process where there is raintall.

(2) By crop removals, Legumes, such as hay and other greens, are taken off the fields, instead of plowed under.

(3) By general use of the soil.

Because of this loss, the soil becomes what is known as high in acid. Putting on limestone may supply calcium and magnesium and correct the soil acidity at the same time.

It has been shown in experiments by agricultural colleges and experiment stations that for every dollar spent for limestone, from $3 to $15 are returned to the farmer through increased yields.

The U.S. Government is so thoroughly convinced of the worth of applying limestone that about one-half of the cost is granted free when application is made for it. This is to encourage farmers to be certain to use limestone.

It does pay to use limestone!

County Hatchery Has New Mgr.

Willard (Bill) Hurlburt, previously farm manager for Tar Heel Chicks, of Charlotte, N.C, has joined the Indian River Poultry Farms, Lancaster, as hatchery manager.

Hurlburt will oversee hatching and distribution operations of Indian River, a department of the Pioneer Hi-Bred Corn Co. of Des Moines.

The new hatchery manager studied poultry husbandry for three years at Iowa State University, Ames, Iowa. He was a vice president of the Iowa Poultry Association in 1962.

Plow Contest Dates Are Set

CHAMBERSBURG — Pennsylvania's top plowmen will compete July 29 for the 1964 state plowing championships on a Franklin county farm, near Edenville, 7 miles west of Chambersburg.

Site of the 1964 meet will be the 200-acre Daniel W. Rumler farm, with Paul Knepper, operator, as host farmer. The competing plowmen, all of them county champions, will have fifty acres for demonstrating their prowess in manipulating tractor-drawn moldboard plows.

ATTENTION, MR. FARMER, Youre in the Limelight!

Representatives of Butler Manufacturing Company —a major source of products and services for agriculture since 1901—are now in this area interviewing a number of progressive farmers concerning their farmstead expansion plans. This survey is the initial step in Butler's plan to appoint a franchised Agri-Builder to serve those interested in more profitable farming operations. The Agri-Builder not only will carry a complete line of quality farm products, but also will be qualified to assist farmers in their expansion planning, construction and financing. Butler believes the establishment of an Agri-Buildership will mean improved farmstead efficiency and increased profits for the farmers in this area, as similar Butler dealerships have accomplished in communities throughout the Midwest.

Factory Representative: John A. Joyce — Ph. Lancaster 872-8561

Milk your cows for all they're worth

(most producers don't)

Get all the milk you can out of your cows. Chances are they could be giving more milk than you're getting now. So feed 'em Pioneer. It helps your cows produce up to their full bred-in capacity. Because Pioneer makes **the feeds with balanced amino acids for better protein building.** Amino acids are the basic building blocks for all proteins. Balance them and you get top production and top profits. How do the Pioneer people know this? They've been in the feed business for more than 90 years. Their scientific research has developed feeds formulated to the genetic capacity of herds in this area. Pioneer builds big healthy calves that develop into high-production, high-profit milkers. And when dry cows freshen, Pioneer gives them all the nutrients they need for producing more milk than before. Let us show you how you can milk your cows for all they're worth. Come in or call soon.

RED COMB PIONEER®
SINCE 1870

Good's Feed Mill

the feeds with balanced amino acids for better protein building

BEST FOOD BUYS
Steak And Pork Loin Are Featured

Beef steaks and pork loin are receiving promotional emphasis this week at many area food stores. Egg prices advance in some stores but receive March Egg Month promotion in others Prices at fresh produce counters continue high but are beginning to show the change of season with the arrival of new items and greater variety. Lenten promotions continue to provide food values for everyone.

Beef And Pork Are Values This Week

Beef continues as a better value in many stores, particularly hindquarter cuts. Steak cuts range from 75 to 95 cents a pound this week on sale which amounts to 30 cents a pound difference between feature prices and regular retail pricing. Fresh pork provides many promotional opportunities too since prices have remained rather stable. Loin cuts are featured in some stores while Boston butt roasts and pork steaks get the value nod in others.

Tips For Good Freezer Management

Regular retail beef prices are not expected to change much in the months ahead but there will likely be fewer steak sales. This could prompt you to "buy ahead." But you should remember the points of good freezer management. If you regard your freezer as "storage" it can be costly. So if you do wish to store some steaks for summer, make certain that everything else in the freezer moves out and is replaced in an orderly fashion.

A Garden In The Pantry

A shelf full of canned foods is just like having a garden in the pantry. Now's a good time to stock your pantry. You'll find sales of both nationally advertised and store brands. Since supplies of canned and frozen vegetables are a little smaller than last year, you may want to concentrate your purchases on those in largest supply. In canned vegetables, corn, spinach, and asparagus are in largest supply. Frozen vegetables in largest supply are broccoli, cauliflower, and spinach.

Compare Frozen Fish Products

When buying frozen fish products, read the labels Compare prices by style, type and container. Remember too that some frozen fish products are cooked while others are uncooked. Sizes vary also Many frozen fish packages weigh a pound but some weigh less, others more Some fishery products are breaded which means you are paying for about one-third breading and two-thirds fish. Learn to compare to be better satisfied with the fish products you buy.

Broiler-Fryers

If you're planning to buy several broiler-fryers to keep on hand, store and care for them properly to keep them at their best. All poultry is perishable and should be refrigerated right after buying it.

Proper storage is important to keep the high quality of poultry whether you buy it chilled or frozen If you buy frozen birds, be sure they are solidly frozen and then keep them that way until time to thaw and cook. After thawing, cook at once

Reduce cost of producing milk!
PURINA COW CHOW D
is built to help you get up to one ton more milk per cow.

Good dairymen know that the most economical milk comes from their highest producing cows . . . and an extra ton of milk per cow can actually *reduce* overall cost of production. That's why Purina developed high-efficiency Cow Chow D . . . to help make more milk at lower cost. Long range feeding tests at the Purina Dairy Center proved this point.

No wonder so many Eastern dairymen are turning to Cow Chow D . . . to help them get up to an extra ton of milk That *could* be the *profit* ton this year! Why wait? Start your herd up the road to top production with Purina Cow Chow D.

Ask us for more information on Purina Cow Chow D. We *love* to talk about it!

LOW COST PRODUCTION . . .

Swine Clinics Start Next Week

A series of three swine clinics, sponsored by the Cooperative Extension Service, will be held March 11, 18 and 25 in the Farm Bureau Building, Dillerville Rd., Northwestern edge of Lancaster

County Agent M M Smith announces the three clinics, designed to cover all phases of modern-day swine production, including feeding, selection, buildings equipment health, costs and returns will be held at weekly intervals with each clinic scheduled to start promptly at 7 30 p m

Specialists in livestock, agricultural engineering, and veterinary medicine - from The Pennsylvania State University, will serve as instructors

At the first meeting March 11, talks will be given by Dr. William Adams extension veterinarian, and Dwight Younkin, extension animal husbandry specialist Speakers at the second meeting March 18 will be Lester Burdette, extension animal husbandry specialist, and Axel Carlson, extension agricultural engineer Appearing at the final clinic on March 25 will be Larry Gobble associate professor of animal industry, and Grant Sherritt, assistant professor of animal industry.

Smith urges all those interested in swine breeding, feeding, and management, to attend the clinics Admission is free

Further information is available from the county agent at 202 Post Office Building, Lancaster.

County Native Wins Promotion

Enos B Heisey a native of Lancaster County, has been promoted to the staff of the General Manager of Pennsylvania Farm Bureau Cooperative Association Harrisburg to develop a program in member relations

Heisey began his Farm Bureau employment in 1946 at Lebanon Valley Farm Bureau Cooperative Association Lebanon, and was named its general manager in 1953

Before assuming his new position, Heisey had served as a district manager for Pennsylvania Farm Bureau since June, 1959

He attended Lebanon Valley College, Annville, and the Pennsylvania State University, State College

Mr and Mrs Heisey live at Martinsburg, and have three sons

Annual Hog Sale Is March 17

Hog feeders from Lancaster, York, Lebanon, Snyder and Dauphin Counties will come to Lancaster, Tuesday, March 17th, for the annual Lancaster County Swine Producers Association Market Hog Show & Sale.

The show will be held in the small animal barn at the Stock Yards, Tuesday morning commencing at 8 30 a m Lester Burdette and Dwight Younkin, hog specialists from Penna State University will be the judges

The auction of these prize hogs will take place in the afternoon at 2 00 p m Wilbur Hosler will call the sale

There will be a carcass evaluation on foot, Monday, March 16th at 3 00 p m Hogs entered for evaluation and possible litter certification will be slaughtered by Kunzler Co, Tuesday and be evaluated on the rail Wednesday afternoon at the plant

Entries may be filed with Earl Fisher, East Earl RD1 or James Z Martin, Christiana, R2.

Judging will be in two weight classes, 190-220 lbs, 221-250 lbs, in singles, pens of three and truckloads according to breed of the sire.

Fruit Growers Elect Officers

Richard Haas was elected president of the Lancaster County Fruit Growers Association Monday night

Haas, foreman of Shank Fruit Farms, was elected during a meeting in the Farm Bureau Coperative building

Other officers elected were Paul Kauffman, Bird-in-Hand R1, vice president, Roy Erb, 118 Kreider Ave, secretary, and Amos Rutt, Millersville, treasurer

The group, in a business meeting, scheduled a summer tour to Adams County orchards and the fruit research laboratory at Arendtsville

The organization, which will celebrate its 50th anniversary next year will hold its annual banquet in conjunction with the Lancaster County Honey Producers Assn April 3

Guest speaker for the meeting was B Wayne Kelly, Pennsylvania State University Extension Service farm management specialist

Extension Ass'n Reorganizes

The Lancaster County Extension Association Monday elected Melvin Stoltzfus president for a one year term

Stoltzfus, a Ronks R1 Guernsey breeder succeeds Robert Groff, Quarryville R3, who had headed the Extension Service's advisory board for three one-year terms Stoltzfus was vice president of the group last year

Other officers elected by the executive board at their meeting in Holiday Inn, Lititz Pike, were vice president, Richard Lefever, Quarryville R1 and secretary, Mrs Robert Hess, Strasburg R1 C. Warren Leininger, Denver R2, was re-elected treasurer.

The committee voted to employ a part-time summer assistant home economist again in 1964

The Future Farmers of America organization is sponsored nationally by the Agricultural Education Branch in the Office of Education, U S. Department of Health, Education, and Welfare FFA is an educational program, conducted in the public schools.

Pennsylvania Farm Show
CHAMPION!
Sunnybrook
Started Capons

Third Straight Year!

For the third year in a row our capons have been grand champions of the Pennsylvania Farm Show. Last year our White Rocks took both champion and reserve.

All through the Northeast growers are making extra profits with our surgical capons. Four to six weeks old when delivered and well past the danger period. Easy to raise, easy to feed. Fast growers that bring top market prices. Direct delivery in our own trucks over a wide area. Write for our free folder.

Auction Barn Set To Open At Stock Yards

The Lancaster Union Stock Yards, established in 1895, will experience its most radical change of the century when for the first time in its history it will operate a weekly cattle auction

The Grand Opening is scheduled for Wednesday, April 1st when the new sales pavilion located in the center of the yards will be opened for business selling cows, bulls, fat steers and heifers, stockers and feeders The ceremonies will begin at 10 00 a m Distinguished guests allied with agriculture and livestock business will be on hand for the dedication There will be a noon luncheon recess between the selling of cows and fat cattle At 1 00 p m the fat cattle will go thru the ring followed by stockers and feeders

The windowless building of steel and concrete will seat 250 people Glareless lighting, thru an acoustical ceiling, modern scales and up-to-date speaker system will enable buyers and sellers to follow the auction in comfort

The Lancaster Livestock Exchange members will handle all consignments of saleable cattle The Stock Yard Co will be in charge of facilities

Equipment Firm Surveys County

A survey is being conducted by Butler Mfg Co in Lancaster County among a number of farmers in the area The quest for information centers around the farmer's buying intentions and future expansion plans.

John A Joyce, District Mgr, a spokesman for the company, said, "This survey is the first step in our company's plan to appoint a franchised Agri-Builder to represent us in this area Butler's Agri-Builder program is a new marketing concept designed to improve farmstead efficiency and create higher profits for the progressive farm operator"
